

BCARA SKYWARN NET

To start the NET:

Attention all stations, this is [CALLSIGN], NET Controller for **Barron County Skywarn Net**.

This is a directed NET for the purpose of a severe weather event. Until the NET is formally closed it will remain active for spotter and emergency traffic only.

The National Weather Service in **Chanhassen** has issued a severe weather warning for Barron County.

NET Controller: Describe the severe weather event as defined by the NWS

When checking into this NET, please provide your callsign and location followed by your mobile or stationary status. Only your direct observations of reportable weather should be reported, no third part information will be accepted.

If you must leave the NET for any reason, please notify NET Control. Consider your safety at all times.

I will now take check-ins and reports.

(Record callsigns, locations, reports and any other pertinent information)

During the NET: (for the net controller only)

NET Controller: send all reports directly to the Baldwin repeater freq. of: 146.250 - 110.9 PL tone and call for KOMPX (reportable information only)

Or Polk county repeater freq. of:147.195 + 110,9 PL tone(if they are running a Skywarn net as well) (reportable information only)

If no answer please call the spotter hotline at 1-800-XXX-XXXX (and give them all the reportable information only.)

Closing the NET:

The BCARA weather **net** is now being lowered to a STAND-BY status. All stations may now use the repeater for normal amateur use. Thank you for your help during this event
73

(CALLSIGN) clear.
